About Space in Africa.

Space in Africa is **solving the data and information gap** in the African space and satellite industry. This gap is the bane of effective policymaking as well as a barrier to new investments across different African markets.

Our Focus

Bridging the Information Gap in African Space Industry.

Facilitating Policy and business interactions through offering actionable insights to our clients

Leveraging our know-how to advise governments, private enterprises and intergovernmental institutions across the industry value chain.

Our Solutions

News

We unravel the business, trends, opportunities, policies and activities in the African space industry.

Research

We produce market analysis, and authoritative reports rich in insights and deep understanding of the African space and satellite industry

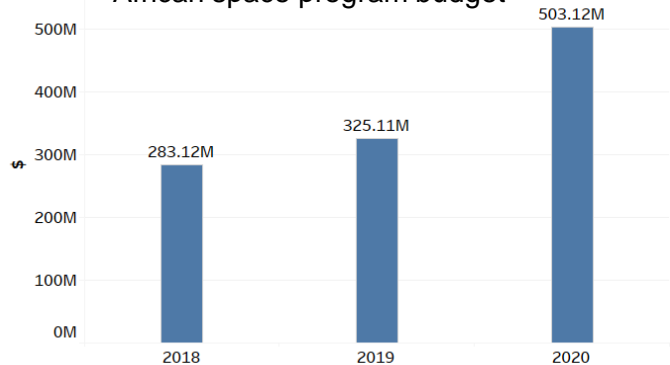

Consulting

We offer bespoke advisory and help clients strategize for the African space market.
