

SLOVAK REPUBLIC**National mechanism:**

The Slovak Republic didn't implement into its legislation any restrictions or rules concerning space debris mitigation policy. The Slovak Republic is currently negotiating its membership into the European Space Agency. This attempt can later lead to the adoption of national mechanism on space debris mitigation.

Description:

None.

Applicability:

None.

Relation to international mechanisms:

Slovak Republic is a member of the Committee on the Peaceful Uses of Outer Space, that is why it fully supports the Space Debris Mitigation Guidelines of the Committee. Furthermore it supports IADC Space Debris Mitigation Guidelines, European Code of Conduct for Space Debris Mitigation, ISO Space Systems – Space Debris Mitigation Requirements (ISO 24113:2011) and ITU Recommendation ITU-R S.1003.

Link to other national mechanisms:

None.
