**Global Views on Human Space Exploration**

The IAF Symposium, under its overarching theme “Global Views on Human Space Exploration”, will look back at the multifaceted and exciting history of space exploration - starting in 1961 with the landmark achievement of Russian cosmonaut Yuri Gagarin - and will discuss the missions, possibilities, and international cooperation's, that will lead us beyond our planet Earth, towards the future of space exploration.

To this end, the Symposium will be divided in two distinct roundtables: a first one focusing on the “60 Years of Human Spaceflights Achievements” and a second one titled “Looking Ahead to the Next 60 Years”.
